Subject: RE: Dimock: Number of samples for Rad analysis

Fred, Rupert:

Attached is the revised analytical request I submitted last week to increase the number of samples. This estimate was based on a total of ~ 60 residences to be sampled, two samples per residence, 12 duplicates, and one field blank per day (estimated 20). I'm not sure if this estimate is still valid.

Rich,

Cindy White from NAREL has expressed a concern about the final number of samples expected to be received for RAD analysis. The projected number was approximately 71 samples, with approximately 52 having been received to-date. Is the final number going to exceed the original 71 samples projected? If so, Cindy needs to know to make scheduling adjustments in her lab.

Fred
